ELECTRIC CLASSIC FIAT 500 CONVERSION KIT

Updating and upgrading an Italian icon

Electric Classic Cars have been converting classic cars for six years and we are now the biggest converter of classic cars in the world with over 65 cars converted.

We have used this experience and knowledge to create a complete bolt-in “plug and play” conversion kit for the Fiat 500.

We have taken the Fiat 500 and dragged it into the 21st century with a lightweight electric motor and battery pack, transforming an ICE relic whilst maintaining its original charm and improving the performance.

The battery pack gives a range from 50 to 70 miles*.

Design & Specification

Power: 40kW

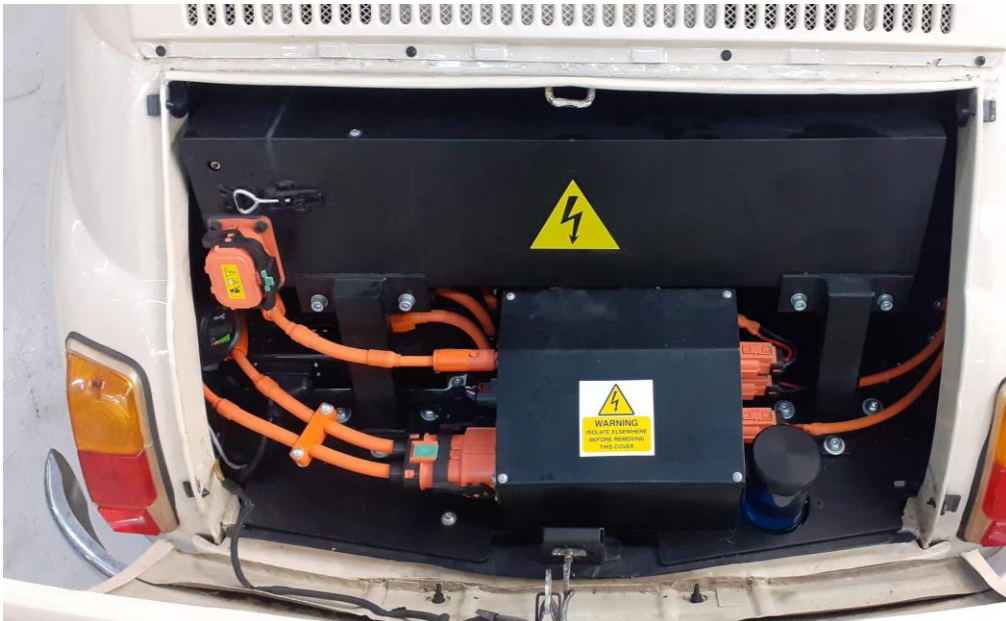

Battery pack: 15kWh – in sealed steel boxes plug and play read with integrated BMS.

Charging: 3.3kW AC type 2 with intelligent controller.

Complete high voltage and low voltage wiring looms ready to plug and play
Battery management display.

Weight: approx. weight neutral to original car.

*** - Range varies depending on battery pack size, tyres, external accessories driving style and conditions. Tested up to 50 miles, average highway driving up to 50mph.**
